

FOR ELASTOMERIC SOLUTIONS, PERFECTION IS OUR STANDARD.

Qure Medical provides differentiated elastomeric components to the world's top medical device and pharmaceutical companies.

Qure Medical provides high quality, integrated elastomeric solutions to medical device and pharmaceutical manufacturers while meeting the most stringent standards of the global healthcare industry. The world's top life science companies rely on Qure's unmatched development and production capabilities for

components that contribute to best-in-class devices and assemblies.

Our specialties include tight-tolerance rubber and silicone molded components, silicone-based sub-assemblies and packaged products, highly advanced QureSil™ and QureFlex™ extruded tubing and a variety of complex profiles. As one of

the industry's largest consumers of heat-cured silicone, we have buying power that we can pass on to our clients. From materials development to packaging of finished products, Qure controls every aspect of production to provide clients exceptional quality and on-time delivery.

Markets and solutions

Fluid Management

- Plunger tips
- O-rings
- Seals
- Diaphragms
- Syringe components

Drug Delivery

- Sleeve stoppers
- Septums
- Valves
- Diaphragms
- IV components

Medical Surgical, Acute Care

- Duckbills
- Valves and seals
- Diaphragms
- Bellows
- Respiratory products
- Dispensing systems

Pharma

- Biopharma products and assemblies
- Pharma tubing
- Plunger tips
- Lyo stoppers

Consumer Healthcare

- Personal hygiene
- Oral healthcare
- Women's health
- Food, beverage
- Sterile packaging

QureSil™

QureFlex™

Unsurpassed Vertical Integration

Materials Development

- 40 years' experience with silicone products
- Extensive library of formulas/DMFs
- Optimized mixing/compounding methods
- Polyisoprene, organic, silicone polymers
- Meet USP, Ph.Eur., FDA, ISO criteria

Engineering Services

- Partner to optimize/prove-out designs
- SolidWorks® 3D modeling
- ABAQUS Finite Element Analysis
- Design for manufacturability
- Mold and automation development

Manufacturing Capabilities

Liquid injection molding. Automated for fast runs to reduce labor, overhead.

HCR transfer molding. High-consistency rubber for micro, mid-sized parts.

Elastomeric overmolding. Expert engineering, development support.

Elastomer extrusion. Tubing, complex profiles length-cut and printed.

Assembly, secondary operations and packaging.

Customized Testing & Analytics

- Leak, mechanical, environmental, flow
- R&D testing
- Fail mode evaluation testing
- Non-contact laser measurement
- Chemical analysis

Quality

- ISO 13485 quality management system
- ISO 14001 environmental management system
- Streamlined project management for full visibility, tracking
- Advanced automation, laser inspection via proprietary process technologies
- Secondary and finishing operations in ISO Class 8 cleanrooms

Q Company

Qure Medical is part of Q, a leading global manufacturer of highly engineered, fully assembled medical devices and elastomeric components headquartered in Solon, Ohio. Qure Medical global locations shown below.
